

# Water is Life and Future

## Responsibility for a Valuable Resource

Water is the essence of our life, our cultural, and economic achievements, our civilisation

- Water covers **71%** of the earth's surface.
- Most of the water on earth, approx. **97.5%** is

- Human and animal bodies contain **70%** water.

- Presently **6.5 billion people** live on earth
- **1.3 billion people** do not have access to clean water.
- Every day **6000 children** die from diseases caused by polluted water.

### The problems:

- Contamination of fresh water resources
- Lack of sanitary facilities
- Insufficient hygiene

**It is most important that we focus on water challenges and act responsibly!**
