

➤➤ Single security door TT2.1/WK3

Completely made from stainless steel

Security class WK3 is recommended by the criminal investigation department if the building is additionally secured by means of a burglar alarm system.

Certified to security of DIN V ENV 1627, inspection level WK3. Applicable as access to buildings, especially in potable water supply, and for plants with increased security requirements.

Security door, burglar and attack proof, certified to security of DIN V ENV 1627, inspection level WK3, ready for installation, double skinned, completely made from 1.4301/1.4307 stainless steel (AISI 304), with double rubber seal. the door and frame closing flush, the door opening to the outside (in escape direction). Sound insulation: 34/29 dB.

Door, with injected CFCs-free polyurethane hard foam insulation, longitudinally ground surface finish, with rubber seal. Fastened to the frame with stable maintenance-free hinge plates. The door and frame close flush. The closed door engaging flush with the frame by means of solid anchor bolts engaging in the frame for four-point locking. Safety lock with austenitic manganese steel plate provided for profile half cylinder (which is not included in the supply contract; the profile cylinder to be DIN V 18252 – P2 – H – BZ), **with anti-panic lock**, i.e. the door can any time be opened from inside by operating the handle, even when locked. Protective stainless steel fitting, without cylinder cover, with a rigidly mounted handle and a red plastic button inside.

Z-frame, three-sided, fabricated from special section, with inserted rubber seal, with step flashing. Including supply of the associated mounting material.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.
