HUBER cooperates with Flottweg – Signing of the contract at IFAT 2008

06.05.2008

HUBER made by FLOTTWEG

On the occasion of IFAT 2008 Hans Huber AG and *Dr.-Ing. E.h. Hans Huber and Peter Bruckmayer signing the cooperation contract at IFAT 2008* Flottweg AG signed their cooperation contract.

Hans Huber AG and Flottweg AG are both medium-sized companies active in the field of solids/liquid separation. HUBER is a worldwide leading supplier of machines and plants for wastewater, grit and sludge treatment for municipal and industrial applications. FLOTTWEG is one of the worldwide leading manufacturers of centrifuges.

Both companies cooperate in developing a new centrifuge for sewage sludge dewatering. HUBER as a system supplier for sludge treatment is then in the position to offer the best possible sludge dewatering solution for any requirements. The basis therefore is FLOTTWEG's long experience as a manufacturer of high quality centrifuges with its well established international service network.

The big sludge volumes in wastewater treatment plants require dewatering plants with a high throughput capacity, optimal dry residue and energy efficiency to ensure economical sewage sludge treatment and disposal in the long run.

New C3E centrifuge: High performance centrifuge developed especially for the treatment of sewage sludge and optimised to meet operators' specific requirements.

FLOTTWEG and HUBER have cooperated in developing the C3E series combining the manufacturing know-how acquired in the course of more than 50 years and a long experience in wastewater and sludge treatment.
