HUBER Service and Maintenance Contracts

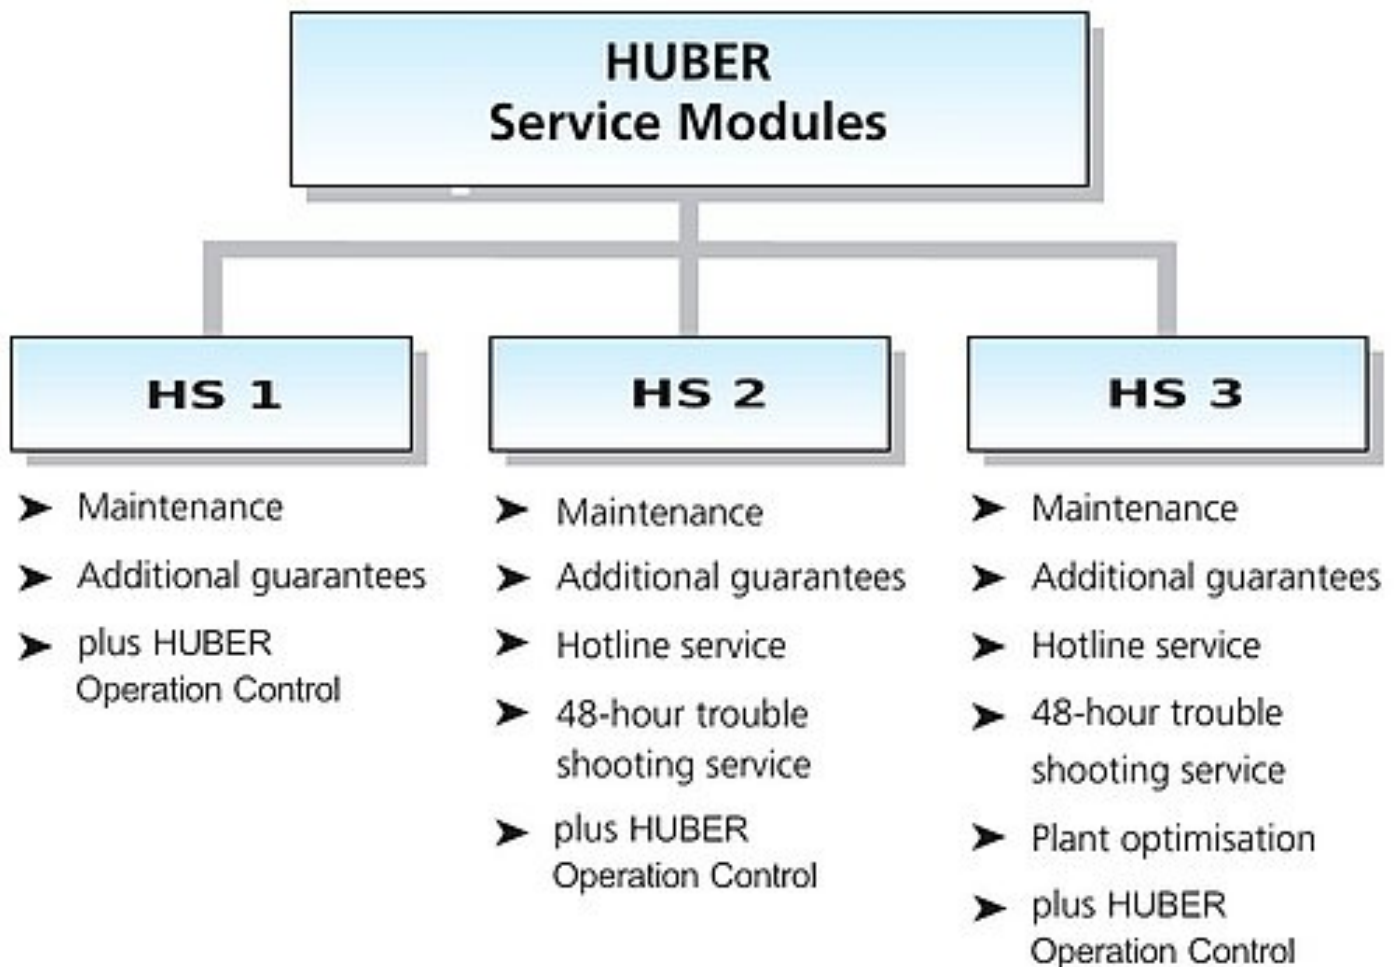

BE ON THE SAFE SIDE WITH A HUBER SERVICE PARTNERSHIP

Sign a HUBER service and maintenance contract for maximum operating reliability at constantly high product performance and therefore reduced operating costs!

The contract provides regular, load and status dependent inspection and maintenance through our service staff. The results of any service inspection and maintenance are directly recorded in a carefully documented check list. Our HS type service contracts (details see below) include, of course, our function and operation guarantee for equipment under regular service, i.e. operating reliability and product availability until the next servicing date.

Any HUBER service contract can be combined with our [HUBER Operation Control system](#). The installation of a HUBER Operation Control system enables our service specialists to daily check all parameters relevant for optimal plant operation and immediately notify the customer in case of any deviation.

Our HUBER Service Centre team will be pleased to help with advice and support in selecting the type of service contract that is ideal for your requirements. Contact us!
